Tennis works nearing match point

Works at the tennis facility are continuing to progress, with fencing and resurfacing now complete.

Only minor fencing defects remain, mainly paint touch-ups. The project team is also working with the resurfacing contractor to address outstanding defects in the new court surface.

A pre-start meeting for the roofing works is scheduled for Tuesday, with construction expected to begin shortly after. The roofing works are targeted for completion by 24 July.

With the major works now served up, the project is moving closer to completion.

Bowls project moving in the right direction

The project team recently met with the Bowling Club to review the pricing received by the City and discuss the next steps for the project.

The Project Manager will continue to keep the Club informed as the project moves through the procurement process.

Do you have a story that you would like told to your greater community? Reach out to the City and we may be able to help spread the good news.

AFL and Little Athletics Pavilion

Work on the new AFL and Little Athletics pavilion continues to progress.

Roofing, ceiling framing and external wall cladding are underway, while plumbing and electrical rough-in works have commenced.

Over the next month, the project team will focus on completing the internal brickwork and continuing the wall and ceiling framing, roofing and external cladding. Wall rendering and floor screeding are also scheduled to begin.

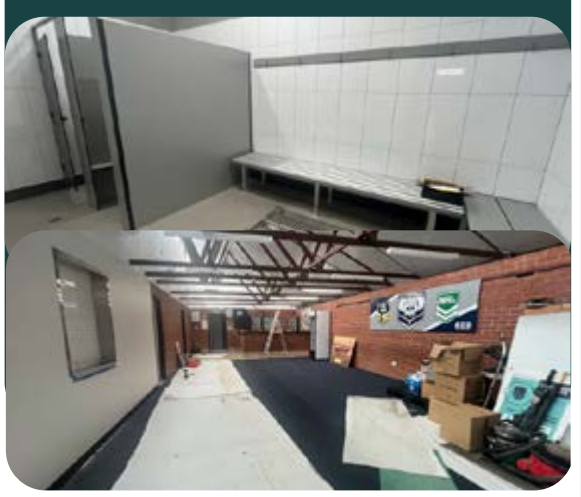

Rugby League works

A practical completion walkthrough has been completed, with several outstanding items still requiring attention before practical completion can be granted.

The contractor has also received a defects list for rectification. Once practical completion is acheived, the project will move through the occupancy permit and public building application processes.

The Club is currently working towards an opening date of 14 August.

FUFC Modular progress lifted to new heights

Footy season is well underway, and the project is kicking goals.

The five modular units were craned into place on 3 July 2026, with each unit carefully lowered into position.

Internal and external works are now progressing, along with landscaping around the new facility.

Click the link on the next page to watch the impressive installation process.

Exciting times ahead.
