SURVEY | FOGO - Three bin waste and recycling system

The City of Kalamunda is considering moving to a three bin waste and recycling system, in order to divert more waste from landfill and to improve the recovery of materials.

This system, known as FOGO (Food Organics Garden Organics), will provide residents with a third waste bin for organic waste, such as kitchen scraps and garden debris like lawn clippings and small branches.

A FOGO system ensures a significant increase in the recovery of materials from the household waste collection and valuable compost can be created from the organic materials diverted from landfill. Where implemented, FOGO has, on average, doubled recovery efforts.

This is a green, environmentally friendly approach to waste disposal and resource recovery, resulting in a more sustainable City of Kalamunda.

The aim of this survey is to understand your future requirements and aspirations for waste and recycling services within the City of Kalamunda. In addition, your feedback will assist the City with their development of a waste management and recycling strategy.

1. The City of Kalamunda is considering moving to a FOGO three bin system. Do you support this?

☐ Yes ☐ No

Why or why not? _____

2. How often do you place your general waste bin (currently dark green lid) out for collection?
