Our Vision

The City of Kalamunda has a vision for Hartfield Park to be a place for everyone to grow, learn and play in the heart of Forrestfield.

Executive Summary

The purpose of this community engagement was to investigate community sentiment and perception of the Hartfield Park Master Plan (HPMP): Co-location Strategy.

Community Consultation for the project was delivered via a targeted *Communications and Engagement Plan* prepared in line with IAP2 best practice principles. The Plan progressed to IAP2 spectrum level 'involve' to work directly with the public throughout the process to obtain public feedback on analysis, alternatives and decisions, and was supported by an integrated marketing campaign.

The targeted campaign ran from 28 April to 26 May 2021.

A total of 130 survey responses and eight written submissions were received from community members; and 11 formal submissions from various Hartfield Park User Groups and/or supporting bodies.

Consultation Meetings

Formal Consultation Meetings were held with representatives from the following User Groups:

Foothills Men's Shed	29 April 2021
Forrestfield Bowls Club	29 April 2021
Forrestfield Tennis Club	29 April 2021
Kalamunda Rugby Union	30 April 2021
Forrestfield Cricket Club	30 April 2021
Kalamunda Bulldogs Rugby League	30 April 2021
Forrestfield United Football Club	30 April 2021
Forrestfield Little Athletics	4 May 2021
Forrestfield Football Club	4 May 2021

Stakeholder feedback will help shape the development of the Master Plan, before being released for final public comment.

Project Background

Hartfield Park Reserve is a Class A Reserve, and is the largest sporting and recreation reserve within the City of Kalamunda (approx. 160ha), containing a wide range of regional community sport and recreation infrastructure that services an extensive area.

The site is also a known aboriginal heritage site of significance, formerly known as Maamba Reserve, which was utilised as an Aboriginal camping site at the turn of the last century.

HPMP Stage 1

The original 2010 HPMP (Stage 1) identified that several existing facilities were single use and indicated the need for a co-located facilities. In 2013, the City received \$6m to implement the HPMP (Stage 1).

HPMP Stage 2

Dave Lanfear Consulting was engaged in September 2019 to prepare Hartfield Park Master Plan (HPMP) Stage 2, in conjunction with the City of Kalamunda and the various sporting user groups at Hartfield Park, building on HPMP (Stage 1), and provide a strategy to guide future development of the reserve. The Plan was presented to Council at the April 2021 Council meeting (OCM 57 /2021).

The objectives of the study were to consider the viability, or otherwise, of co-locating key stakeholders and to investigate how the existing reserve and its facilities can be improved to respond to contemporary design, users' expectations and meet the general needs of a growing community (within financial constraints).

The proposal included plans to improve the off-street parking within the site and infrastructure such as storm water drainage.

Key features include:

- » New clubroom facilities for AFL / Little Athletics; Bowls and Tennis; Rugby Union and Cricket.
- » Unisex changerooms for Rugby League and Football (soccer).
- » New Little Athletics infrastructure including long jump pits.
- » Extension of Morrison Oval with new sports floodlighting.
- » A new facility for Foothills Men's Shed.
- » New cricket nets.
- » Conversion of a grass bowling green to synthetic.
- » Development of two new tennis courts.
- » Expanded and realigned car parking across Hartfield Park.

Community Engagement

Tools and objectives

The City ran a targeted, integrated, community engagement campaign working with key stakeholders and the broader community, encouraging their contributions and feedback.

Engagement Tools	Overview of Objectives	Summary of Outcomes
Media Release (MR)	Targeting media outlets for a broader reach. Media Release published project 28 April 2021 Media Query on 6 May 2021.	✓ A Newspaper Article "Kalamunda Advocates to Parliament" was published in the Echo News (Kalamunda Edition).
Website	Accessible, translatable, transparent. Single point reference. Links to EngagementHQ and Social Media.	✓ Awareness raised. ✓ Access to all resources and project information.
EngagementHQ	Providing online access to FAQs, Online Survey, additional reading and links	✓ Engagement HQ received 524 visits
Online and Printed Surveys	Online: Accessible, translatable, transparent. Online: ensures real time access to responses Online: environmental as it reduces waste. Print: tangible, tactile and reaches stakeholders who are not online. Distributed across all the City's buildings Target: Minimum of 100 surveys completed	Hartfield Park Project Survey (Open: 28 April - 26 May 2021) ✓ received 130 responses and 8 Public Submissions. » Noted: uneven gender response: 87 x Male, 33 x Female, and 3 x Other MARKYT® Community Scorecard Report: 2020 Survey ✓ 483 randomly selected residents and ratepayers completed a scorecard.
Social Media Campaign	Targeted posts can reach stakeholders 24/7: Facebook posts, LinkedIn, Twitter, Instagram.	✓ Social Media received over 9,719 impressions and 219 engagements. ✓ Sentiment was positive in response to the draft Hartfield Park Master Plan campaign. ✓ The City's Facebook Page gained 68 new followers.
Face-to-Face	Providing two-way engagement. Target: Meetings/workshop with representatives from each Club.	✓ 11 Formal Responses were received from the individual Clubs: » Forrestfield Cricket Club (Inc.) » Forrestfield & Districts Bowling Club » Foothills Men's Shed » Forrestfield Football Club » Forrestfield Tee/Base/Soft Ball Association Inc. » Forrestfield Little Athletics Club » Forrestfield Tennis Club (Inc.) + Tennis West / Letter of Support to Forrestfield Tennis Club (Inc.) » Forrestfield United Football Club » Kalamunda Districts Hockey Club » Kalamunda Districts Rugby Union Club » Kalamunda Bulldogs RLFC

Continued over...

Engagement Tools	Overview of Objectives	Summary of Outcomes
Email Direct Marketing	Reaching City of Kalamunda Subscribers to create awareness and invite feedback.	✓ EDM (eNewsletters) were sent to all City subscribers (1740 email addresses) ✓ Total Opens: 2,150
Newspaper Adverts x2	Reaching the broader community who do not have online access.	✓ Awareness raised.
Posters	Visual campaign.	✓ Awareness raised.
Printed Flyer	Reaching stakeholders who are not online. Distributed across all the City's buildings	✓ Awareness raised. ✓ Positive consultation experience.
Mail out/ letterbox drop	Directly targeting stakeholders, and raising awareness, and invite feedback.	✓ Awareness raised. ✓ Positive consultation experience.

Strategic Planning Alignment

Kalamunda Advancing 2031 Strategic Community Plan

Priority 1: Kalamunda Cares and Interacts

Objective 1.2 - To provide a safe and healthy environment for community to enjoy.

Strategy 1.2.2 - Advocate and promote healthy lifestyle choices by encouraging the community to become more physically active.

Strategy 1.2.3 - Provide high quality and accessible recreational and social spaces and facilities.

Objective 1.3 - To support the active participation of local communities.

Strategy 1.3.1 - Support local communities to connect, grow and shape the future of Kalamunda.

Strategy 1.3.2 - Encourage and promote the active participation in social and cultural events.

Priority 2: Kalamunda Clean and Green

Objective 2.2 - To achieve environmental sustainability through effective natural resource management.

Strategy 2.2.1 - Facilitate the appropriate use of water and energy supplies for the City.

Priority 3: Kalamunda Develops

Objective 3.1 - To plan for sustainable population growth.

Strategy 3.1.1 - Plan for diverse and sustainable housing, community facilities and industrial development to meet changing social and economic needs.

Objective 3.2 - To connect community to quality amenities.

Strategy 3.2.1 - Optimal management of all assets.

MARKYT® Community Scorecard Report

2020 Community Perceptions Survey

The City of Kalamunda commissioned CATALYSE® to conduct a MARKYT® Community Scorecard from 23 March to 14 April 2020. The purpose of the study was to evaluate community priorities and measure Council's performance against key indicators in the Strategic Community Plan.

Scorecard invitations were sent to 4,000 randomly selected households; 1,000 by mail and 3,000 by email.

483 randomly selected residents and ratepayers completed a scorecard.

Local community recommendations to address top priorities			
Playgrounds and reserves  1. Improve maintenance and upgrade facilities 2. Make parks and playgrounds more engaging with more nature areas, youth activities and exercise equipment 3. More dog friendly parks and exercise areas	Footpaths & cycleways  1. Provide dedicated cycle paths and lanes to improve safety 2. Improve connectivity 3. Repair and upgrade footpaths 4. Improve walk trails and signage 5. Network of mountain bike trails to protect native bush	Streetscapes  1. Proactive and regular maintenance of verges and street trees to improve appearance and safety 2. Plant more trees; replace dead, inappropriate trees 3. Create a consistent sense of place, more beautification	Character & identity  1. Review planning policy to preserve and maintain local character and identity (complementary scale and design; manage subdivisions) 2. Re-create a vibrant, attractive and inviting community / shopping hub and town centre
Safety  1. Increased Police presence / security patrols to address break-ins, looting and anti-social behaviour 2. Establish a local Police station 3. Install more CCTV, improve street lighting and more traffic calming	Traffic  1. Improve intersections to keep traffic flowing safely (lights, roundabouts, overpasses) 2. Slow down traffic on local roads (modified speed limits, traffic calming, signage) 3. Modify roads to restrict access 4. More pedestrian crossings	Economy  1. Greater support for local businesses - revitalise shopping areas, restrict large / chain stores (mixed views), easier approvals for new ventures 2. New and restored tourism attractions 3. More local job opportunities	Sport & recreation  1. Upgrade the aquatic centre 2. Upgrade the gym and recreation centre and improve range of activities 3. Provide more facilities (e.g. skate parks, extra basketball courts, etc)

MARKYT  5

83% of respondents gave the City's sport and recreation facilities a positive rating.

Community Driven Actions:

Playgrounds, parks, reserves and ovals

- » Improve maintenance and upgrade facilities at local parks and public open spaces
- » Provide natural community spaces
- » Make parks and playgrounds more engaging
- » Provide more activities for youth
- » Improve exercise equipment at local parks
- » More dog friendly parks and exercise areas

Sport and recreation facilities

- » Upgrade the gym and recreation centre and provide an improved range of activities
- » Provide more facilities (e.g. skate parks, extra basketball courts, etc)

74% of respondents gave playgrounds, parks, reserves and ovals a positive rating.

Sample of feedback received:

"Maintain parks and recreation grounds, most are in a terrible condition and unfinished."

"All the parks I go to with my kids need a lot of maintenance. It would be good to see parks upgraded and maintained."

"Retention of trees, bushland, natural landscapes... Retention and upgrading of public open space."

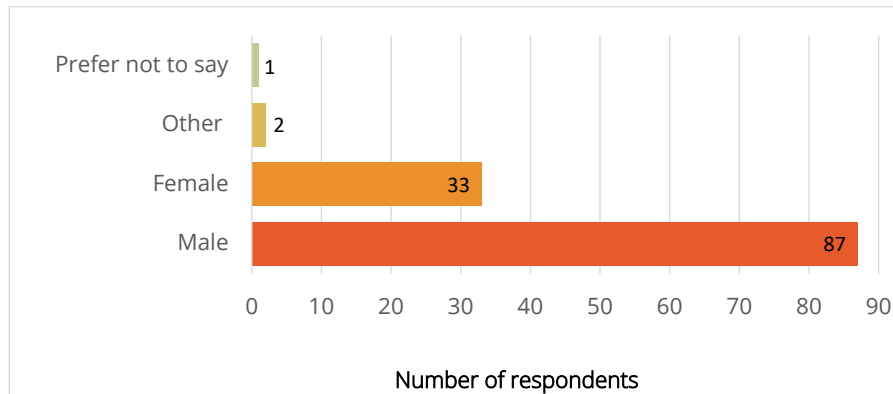

"Outdoor community areas. Would love to see a great playground and BBQ area in Forrestfield."

"Improving the recreation facilities. The current gym in Forrestfield is small and needs updating."

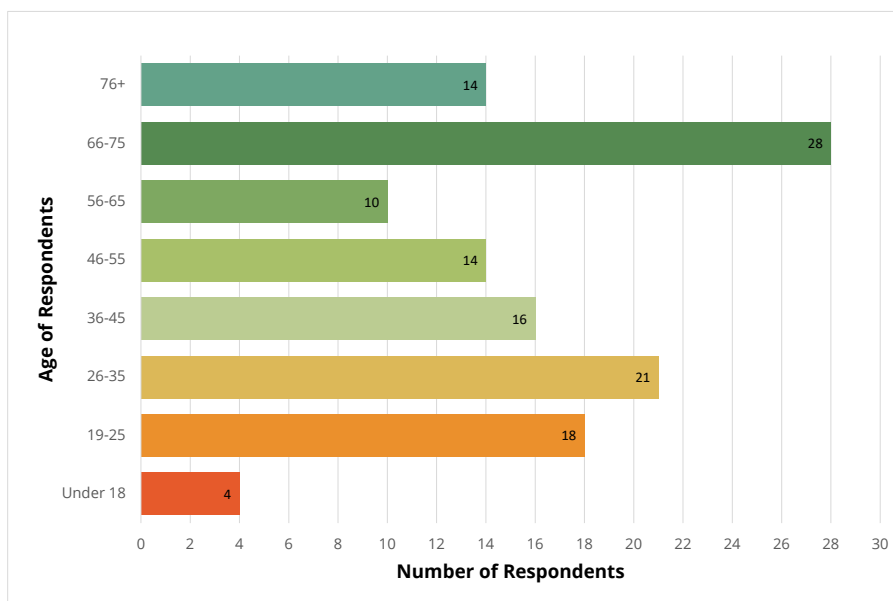

"Hartfield Recreation Centre needs to be 'Bulldozed' and start again! (Mills Park Beckenham is a great example)."

Engage (Survey) | Things liked about the Plan

Key themes extracted from responses to the statement
"List three things you like about the draft plan for Hartfield Park".

Full responses to the statement "List three things you like about the draft plan for Hartfield Park".

*Note: Text below has been included without edits as provided by respondents.

Respondent	Three things respondents liked . . .		
	1	2	3
1	great for football	great for little athletics	
2	New clubroom facilities	Two new tennis courts	Extended car parking
3	Co-Location of facilities to enable multiple sports to have a establish a home. Offering diversity in sport and ability to grow.	Winter and summer sports. I am not a believer that people should do the same sport all year long. Great to get kids involved, but should be encouraged to do a summer sport and a winter sport.	
4	It has been established that funding from government is more likely and can benefit a larger populous, if managed and directed correctly, favouring both large clubs and the smaller clubs that may not have the experience or knowledge within the club to apply for these grants. Utilising co-location strategies reduce the need for security and if successful both clubs can draw on the other success and learn from failures.	Provisions of contemporary sports and recreational needs. Most clubs have issues with storage and ability to advertise success within the club. Better lighting means the grounds can be used longer, however, more consideration needs to be adopted for Internet and general use of the facilities. Expert advice could see the grounds and facilities be utilise to its optimum. Examples of such is the hockey/Teeball Facilities having a grand stand facing westerly, making this area difficult to use in the afternoon.	Provide equality of access to all members of the community. It has been noted that larger clubs develop strategies to manipulate and encroach on smaller shared users. It is refreshing to see thought been given to equality to all members of the community. However, More thought needs to be given to structuring a fair tenant agreements for clubs to operate and grow and clubs should not be able to influence another club or restrict their season operation.

Respondent	Three things respondents liked . . .		
	1	2	3
5	Change room upgrades to allow for all abilities to be able to use the facilities	More parking	Upgraded lighting
6	Hockey Club		
7	New club rooms for the Rhinos	Investment into the facilities	X
8	Upgrade to Bowling Club and Green. Have been involved with the Club for past 4 years with Parents being Foundation Members. With upgrade the Club can really progress with more Carnivals and being a club of choice to host State and Masters events.	Sporting activities have always been a priority in our family growing up. With all complex's being close and the facility upgrades will help get kids into a variety of sports and should retain them actively involved in their teenage years. The Master Plan has given fair consideration to all aspects of sport in our community.	The Men's Shed given a priority to function for the benefit of stakeholders. It is an important part of our Community
9	Is the upgrading of some facilities		
10			
11	New club rooms for AFL and Little Athletics, Rugby and Cricket	New Little Athletics long jump pits	New tennis courts
12	Upgrade to facilities for Rugby Union are long overdue	Rugby Union as a main user could be catered for the next 25 year growth	Additional parking has been considered given ground attendance for Rugby Union approaches 1000 patrons
13	Nothing	Nothing	Nothing
14	Location		
15	location		
16	Bigger club rooms	New facility	New changerooms
17	Men's Shed will attract more new members and help eliminate Men's mental health problems		
18	Men's shed will be a huge asset for Forrestfield area	Increase in facilities for all sports will attract more permanent residents to area.	
19	A new facility for Foothills Men's Shed	Conversion of a grass bowling green to synthetic	
20	Foothills Men's Shed	Good amenities	
21	Provision of new Men's Shed		
22	Provision of a Men's Shed	Upgrade of facilities at bowling club	All sports at Hartfield Park are catered to
23	Look forward to the new larger safer Men's Shed		
24	Bigger Men's Shed	Synthetic Bowling Green	
25	The new plans for the Men's Shed		
26	New Men's Shed would be an asset	Improve the Bowling club long overdue	Parking will be improved
27	Proposed new Men's Shed		

Respondent	Three things respondents liked . . .		
	1	2	3
28	New Men's Shed	Proposed extension to Lawn Bowls Club	
29	Improvements to Bowling Club	The new Men's Shed	Improvements to Tennis Club
30	New Men's Shed	Improvement to Bowling Club	
31	The new Men's Shed	Improvements to the Bowling Club	
32	New Men's Shed	New facilities for Bowls	Updating of amenities for rest of community
33	Facility for Foothills Men's Shed	Tennis Courts	Expanded carpark
34	More Room	Better facilities	User friendly
35	New facility for Men's Shed	Unisex changeroom for Rugby Club	New Little Athletics
36	The new Men's Shed		
37	Multi organisations at the one location		
38	I agree with the new location [Men's Shed]		
39	Agree with the new location [Men's Shed]		
40	Relocating the Foothills Men's Shed	The co-location of the sporting amenities	Expanding the car parking
41	Extension of Morrison Oval	Various new clubrooms	Facility for Foothills Men's Shed
42	The new Men's Shed will be a great way to draw in new members	Upgrade of Bowling Club and Tennis Club will be good for all members	
43	The proposed Men's Shed	Renos to the Bowls Club	
44	Plans for the new Men's Shed		
45	The new Men's Shed will be a great asset to members of the Men's Shed and the general community		
46			
47	The new sports facilities	The car park getting done up	Little athletics for my kids
48	Separately clubhouse with cricket and rugby union.	At least 6 change rooms for the rugby union.	More car parking
49			
50	Improvement of aged facilities (particularly buildings) to provide a more modern, professional-looking sports complex.	Looking into increased light requirements for sports, particularly small ball sports with a minimum of 250 lux.	Encouragement of multi use facilities, including grounds and club rooms. More focus on similar sports that are seasonally separated (e.g. winter and summer sports). However many sports that are traditionally single season sports are now expanding to include full year programs. This must be considered when suggesting co-location, as facilities may need to be used by multiple clubs at a single time

Respondent	Three things respondents liked . . .		
	1	2	3
51	New Clubhouse for the Rugby and Cricket.	Extra Parking	Better lighting for the rugby oval.
52	That the tennis is going to get 7 courts, after a confirmation email from the City.		
53	Inclusion of minor sports in improved infrastructure.	Improvements to be made to lighting infrastructure to accommodate small ball sports.	In essence the proposal for co-location makes sense.
54	Able to cater for more sports	The fact that all ages from young one to seniors are being considered in this plan so that we can encourage the whole community to participate in a sport.	Using the co-location to help with the parking issues
55	Adding one new court.	Adding overflow car park.	Adding new LED lights.
56	Very little		
57	Improvement of amenities	Nil	Nik
58	Confirmation that tennis club will have 7 courts.	new toilet facilities for tennis	
59	Rugby is the main user of the park and needs to be considered for the next few years	Catering for the increasing community population	New club facilities!!!
60	It shows a desire to plan for the future	It includes a range of users and their needs	It identifies the areas significant biodiversity values
61	New facilities	Community involvement and inclusiveness in all codes	If all needs are addressed - brilliant idea.
62	Nothing	Nothing	Nothing
63	Improving the safety of the buildings for families	Many clubs and sports are benefiting	Including more lighting for carpark area increases personal property safety
64	Increased parking	New facilities	
65	Extensions of facilities	Combining all sports in the area	Overall outlook for the future
66			
67	Nothing	It's a bad idea	Don't do it
68			
69	New Rugby union clubroom	Shared facilities	
70	New club facilities	Catering for the increasing community population	Rugby is the main user of the park
71	The upgrade of carparking		
72	Finally upgraded.	Expansion of areas	That the council is improving Hartfield Park
73			
74	New Club facilities	Rugby union is the main user of the park	

Respondent	Three things respondents liked . . .		
	1	2	3
75	Collab community sports	New partnership	Updated clubrooms
76	New rugby club facilities	Catering for increasing community population	Rugby union is the main user of the park and needs to be considered.
77	New club facilities	Catering for increasing community	Rugby union is main user
78	New Club facilities for Rugby League Club		
79	N/A - Nothing		
80	New Club facilities	Catering for increasing community population	Rugby union is the main user of the park & needs to be consider for next 25 yrs.
81	Additional parking as our numbers are growing	Upgrade to facilities for Rugby Union are long overdue	Rugby Union as a main user could be catered for for the next 25 years.
82	Unisex facilities, need 6 total. For female	Rugby union the main users	
83			
84	carpark	floodlighting	
85	New clubrooms		
86	x		
87			
88	Two storey viewing for our club		
89	Rugby Union is the main user of the park and needs to be considered for the next 25 years	New club facilities	better parking
90	I'm happy for the clubs that are being looked after but not happy that the kdhc are being inequitable excluded from HPMP2	The bowling club is being afforded a second synthetic green which inturn will reduce running costs,water etc and upkeep by City.	The similarity of the HPMP2 in relation to other plans that have been prepared by Dave Lanfear Consulting for various Shires seems to me that one plan fits all. In other words he appears to have a cookie cutter style.
91	The Clubs new facilities	Rugby Union is the main user of the park, we need to be considered for the next 25 years	Catering for the increasing community population
92	Clubroom facilities	Expanded carpark	New cricket nets
93	Upgrade	Space	Enlightment
94	New and bigger clubroom facilities	Expanded carpark	
95	New club facilities	Catering for the increasing community	Rugby union is a main user to be consider for the next 25 years
96	New and bigger club facilities	Bigger parking space	More changerooms 6 instead of 4
97			
98	Unisex changerooms for rugby league and soccer (for World Cup commitment)	Extension of Morrison Oval with new floodlights	New Little Athletics infrastructure including jump pits Conversion of a grass bowling rink to synthetic

Respondent	Three things respondents liked . . .		
	1	2	3
99	Improved facilities.		
100	Upgrading of local facilities	Inclusivity	Bringing together of sporting, environmental and social activities into a first class facility
101	Extension of morrison Rd oval and flood lights	Unisex change rooms	Expanded car parking
102			
103			
104	Love that the sporting areas are being upgraded	There is a variety of sports being catered for.	It's diversity
105	It's expanding the sports pavilions	It's adding unisex bathrooms to facilities	Diversity of sports offered
106	Sharing facilities	Saving costs	
107	It is attempting to improve the facilities for the community		
108	Improve the present availability and Quality to the Local Community of all existing and additional sport recreation on Hartfield Park and Hartfield Road. Forrestfield	Sport is essential for the balanced development of our children!	It will save Governments billions in medical /psychological expense
109	New Synthetic bowling Green	Bowls club upgrade	Car Parking
110	Tennis Club having their own rec room	Extra storage for flags, bowls and accessories at bowls club	conversion of grass green to synthetic bowls rink
111	Expanded car park	New club rooms	New synthetic bowls green
112	New bowling facilities and green	car park redevelopment	
113	New bowling green	club upgrade	parking
114	Better tourist spot	encourage people on sports	renovation of the NE main shed will be an asset
115	All good for the public	Great for the community	Love it
116	New club facilities	synthetic bowls green	bowling club
117	Bowling club renovations	New Mens shed	
118	office space bowls club	more toilets	more hall space
119	Money being spent in Forrestfield not Kalamunda	Improvements to bowls/tennis club, but clubs keeping own identity	synthetic green, improved lighting(bowls) and improved car parking
120	new club room	conversion of bowls green grass to synthetic	
121	New club rooms for bowls and other sports	conversion of grass green to synthetic bowling green	upgrades and additions to car parking
122	Conversion of grass green to synthetic	upgrading facilities at bowling club	
123			

Respondent	Three things respondents liked . . .		
	1	2	3
124	Increased room in bowls clubhouse	extra space for outdoor activities undercover of patio	new kitchen space for functions
125	New bowls clubroom extensions	conversion of bowls green grass to synthetic	new facility for Mens Shed
126	Forrestfield Bowling club new synthetic green	facilities to attract new players	more room for entertaining in the future
127	Extra Carpet green	more room to car park	possible more members
128	Plans look great	Mens shed required	Bowling club renovation required
129	New clubroom for bowling club	New facilities for Mens shed	conversion of greens
130	Improve the present availability and quality to the local community of all existing and additional sport recreation on Hartfield Park and Hartfield Road	sport is essential for the balanced development of our children	it will save governments billions in medical /psychological expenses

Engage (Survey) | Needs further consideration

Are there any aspects of the Draft HPMP Stage 2 that you feel need further consideration?

Overview:

For Rugby 6 x Changerooms not 4, to address increase of Women playing and number of teams on game days. (x 21 respondents) - Rugby - Improved spectator viewing - with shelter/close to kitchen/bar. (x 15 respondents) - Rugby - Inclusion of Gym (x18 respondents) - Rugby - Bigger kitchen - including bar and coolroom (x13 respondents) - Rugby - Keeping the <i>historic</i> clubrooms (x 5 respondents)	Upgraded Playgrounds - with fencing	Improve lighting, to improve safety (x28 respondents)	Integrated design to include signage, pathways, shelter, room layout, facilities and access for disabled.
	Hockey - Turf	Morrison Road alignment to address blind corner and safety issues.	
	Remove MOUs via Clubs - all tenants at same level	More parking (x 28 respondents).	Re Men's Shed - Open on weekends - Consult with whole committee - inappropriate for sporting facility.
	Hockey and Teeball: Inclusion in the Stage 2 plan. (x 10 respondents)	Add Netball/basketball training courts	Tennis - hitting/practice wall
		Concern around the allocation of rooms re the co-location with Tennis and Bowls.	The definition of what is a traditional summer/ winter sport is changing
			Reposition cricket nets

Full Responses: Needs further consideration

*Note: Text is without edits as provided by respondents. Respondent's that did not include a comment have been removed.

Respondent	Needs further consideration	Respondent	Needs further consideration
1	relocation of FTC. No real consultation with members! We are happy with our current facilities.	5	Yes, there are no netball/basketball courts that can be utilised for training. Ray Owen and Maida Vale are over flowing with teams having to share courts.
2	The allocation of rooms in the tennis club/bowling club shared facility.	6	The hockey club. It's not included at all. We do t have sufficient flood lighting for our expanding club.
3	Removal of MOU agreements and other contracts that give perceived power to individual clubs over others. All clubs should have the same rights to grow, innovate and fail without being monitored and performance managed by other users of the facilities and grounds.	7	More female inclusive club rooms.
4	In season clubs needs the ability to innovate, explore and try new things. Social aspects of clubs play a large part in the development of clubs and its culture. Greater consideration needs to be given to in-season clubs flexibility to maximise their time to develop this culture without influence from out-season clubs attempting to "cash in" and make a profit at the expense of in-season clubs. MasterPlan2 and other policies within the city highlight the need for diversity not for expanding of out-season clubs into off seasons. Placing larger focus on agreements can lead to clubs interacting better, given a even agreements over facilities and ground use.	8	I'm not sure of the parking availability as would be good if people didn't have to park on Hale Road to access the Park. This becomes a bit of a hazard for families with young children as is a very busy road. Signage will also be important

Respondent	Needs further consideration
10	1. The rugby club having 4 change rooms is not inclusive for the size and diversity of the club. 6 are needed to engage the women's side of the sport. 2. The layout of the club rooms to the playing field results in a poor view of the primary field. Having the primary field on Morrison oval, adjacent to the club rooms would rectify this problem. The soccer club has no issue like this. 3. Parking is inadequate already, surely there is a way to rectify this. 4. No gym space has been placed in the club room plan. This space offers the ability to rehabilitate players and provide a space for them to attend training regardless of whether they can be fully involved. In the long term this results in better retention of players and this growth of the club.
11	Not enough new parking for Morrison Oval to cater for the number of cars when the clubs are playing at home The proposed rugby/ cricket club room does not sit near the centre of the rugby field and will be very poor for viewing the games from either side. Perhaps the cricket nets and the U9 soccer field could be moved elsewhere and the rugby field moved more in that direction to align with the club room, considering they are part of the Premier competition in WA. The other option would be to move the fields on Morrison over further to the west and allow the 2 rugby fields on the East oval to be aligned North/South There is nothing on the plan for the junior size rugby fields that are required by RugbyWA for 6 to 11 year old competitions. Yet it appears the soccer club has been allowed 4 full sized fields and 5 junior sized fields
12	The facilities planned need to align to the no 1 field for spectator viewing. There need to be 6 change rooms to cater for mens and womens teams on match day for a total of up to 6 matches played. There needs to be gym facilities for use as per a semi professional training facility. The new morrison oval needs lighting comiserate with first class Rugby Game standards. Rugby union uses its facilities 365 days of the year with winter season and summer touch programs.
13	The rugby field is not ideal to be spilt up like the plan you have drawn up. I believe that you should build the rugby fields on Morrison Oval. Also parking is not ideal as it will not be enough not only for Rugby spectators/ players but cricket spectators and players.
14	N/A

Respondent	Needs further consideration
16	Rugby field needs to run long ways so supporters can sit near the club rooms and still watch the game, instead of watching the game from behind the field
20	Parking
22	Parking
25	no
26	General lighting
29	Parking
30	Parking and Lighting
31	Parking
32	The new and improved Men's Shed will be much better than the dilapidated premises currently occupied on Anderson Road
33	Extra lighting in the area
34	Consult Men's Shed committee
35	Men's Shed
37	Centralise services
39	No
42	Hopefully Men's Shed can open on weekends
43	Lighting, Parking
46	More changing rooms, a function centre, a gym, and more parking are needed for the rugby clubhouse/ grounds.
50	Inclusion of Kalamunda Districts Hockey Club and Forrestfield flyers Tee ball Club into the master plan is a necessity. Although current club-room facilities are fantastic, current lighting is inadequate for growing clubs such as KDHC, who require more than the two light towers during the week to allow multiple junior teams to train at the same time. This is not only a logistical concern, but also a safety concern. Hockey and Tee ball can both be dangerous sports, with high speed, hard balls throughout training and games. Adequate lighting is a must-have to ensure members of the club feel safe during evening training sessions, particularly in winter where light fades much earlier than summer. The plan outlines a minimum lighting value of 250 lux for small ball sports. I doubt current lights reach this value, and the radius of each light tower only allows two practice quarter fields to be utilized when it is dark. In order to continue growing at its current rate, KDHC must provide members with safe, professional conditions to play hockey in. It would be quite concerning if a significant injury is to take place due to inadequate lighting, thus upgrades must be considered.

Respondent	Needs further consideration
50+	The 5km catchment radius, in my opinion, fails to capture the true population of club members throughout Hartfield Park. A significant proportion of this area is industrial or airport area, and the catchment fails to capture a significant part of Lesmurdie, Kalamunda, Maida vale and suburbs further east. Many club members travel from these suburbs to play sport at Hartfield Park, particularly high level soccer and hockey, where these are the closest facilities. These areas should be considered in the catchment area to provide an accurate assessment of use into the future.
51	Focus on the rugby portion, the people there are a credit to the community.
52	- Parking around the Tennis and Bowling Club - A hit up wall similar to the current setup at the Tennis Club - The layout of the Tennis and Bowling Club house - Bigger cover area off from the club house for the Tennis area - Path access to ALL courts - Shelter positioned behind ALL courts - Room layout of club house
53	1. Inclusion of Hockey and TeeBall grounds within the boundary for HPMP 2. Both are small ball sports and require vastly improved lighting to enable night time use of facilities for playing of fixtures. This will place them in a position of equity to sports such as soccer, AFL and rugby whose improved lighting will allow for such competition. 2. Further investigation into the process of co-location. Many sports are now being played across both summer and winter seasons (and everything in between), meaning that the traditional concept of one sport vacating facilities is not as viable as it once was. 3. Consideration into entertaining the co-location of sporting clubs represented in multiple suburbs. For example, Athletics clubs within the city to all operate from a single purpose built facility. Co-locating like sports throughout the city rather than co-locating two (or more) different sports with vastly different requirements, at the one location. Sports which are not duplicated (eg hockey, squash) deserve to have fit for purpose facilities which meet the optimal standard for the development of their sport. There is only one hockey club in the city (350+ members and growing) which currently has high level senior and junior teams travelling outside of the city at considerable cost, to train at facilities of this type.
54	Definitely more facilities for the disabled

Respondent	Needs further consideration
55	1. Needs hitting wall 2. Existing lights needs to be changed to LED 3. Need patio or undercover near the kitchen 4. New building wall to be straight not in angle
56	All of the plans for the rugby facilities
57	Colocating the rugby Union and cricket club rooms has some issues. It appears as though the club rooms will provide ideal viewing for cricket but terrible viewing for rugby as it is located at one end of the field. Spectators will have the option to enjoy the amenities (bar/canteen/licensed area) OR watch the games, which will have a detrimental impact on the game atmosphere OR the opportunities to raise club funds. The proposal also does not appear to provide sufficient room for gym equipment, nor growth in the club, particularly in the women's game. It would be appreciated if the plans could be reconsidered to prioritise the needs of the Kalamunda Bulls in Alton to the cricket club.
58	Yes shelters, pathways to tennis courts, hit up wall, parking.
59	No 1. Rugby field needs to be aligned with the new club for quality spectator viewing. Need bigger carpark closer to the club. Cooler room and kitchen need to be bigger. Need room for a gym. Need six change rooms (four not enough) to cater for all mens and womens teams Need a longer bar Need lights for kids playground (solar lights)
60	Yes, more work should be done on identifying the current environmental values (reposts quoted are several years old in many cases, so data is not current) and significant work is required to identify the cost of impacting any bushland areas (financial, reputational and in terms of Urban Canopy targets)
61	1. Alignment of the Building against current Fields 1 & 2 - not suitable viewing. Overcome this with new pitch on Morrison Oval with build running parallel and lighting appropriate before use. 2. Six change rooms not 4 (Take out comments - need vs WANT attitude) this is a need. 3. Gym facilities - room space. 4. Parking increased not decreased 5. Kitchen and bar space to small

Respondent	Needs further consideration
62	Lighting at the hockey fields
63	I feel that the hockey and tee-ball area from stage 1 need further consideration and need to also be listed on the stage 2 planning. The current lighting is grossly inadequate for teams including junior teams that are training in the afternoon / evenings. Hockey is a winter sport and the sun sets early in winter and so more lighting is required. There is also an issue of persons coming and doing burnouts on the unlit dirt side of the carpark on training evenings when we have kids and junior players near by which is very dangerous. Lighting here would also serve to deter persons doing this as well
64	Location of the rugby facilities is poor for viewing. Limited changerooms - doesn't support womens teams. Facilities of rugby not adequate - need gym, more space for kitchen
65	No. Everything is well mentioned
66	Rugby 6 change rooms And a gym
67	No
68	Playground fencing Rugby field upgrades + lights
69	Rugby union fields need to be positioned better w.r.t the club. Need more changerooms for women's teams. Needs additional parking. Needs a room for the gym.
70	6 changing rooms (2 for women's) more parking, room for gym, need a cool room
71	The History of the Kalamunda Rugby Union Club Size of the change rooms and lack of changerooms The size of the bar and the kitchen
74	No 1 field need to be aligned for quality spectator viewing Need 6 changing rooms. More parking. Need room for a gym
75	Currently have inadequate parking No space to include change rooms Not enough change rooms
76	No 1 field need to be aligned for quality spectator viewing need 6 change rooms to cater for all mens teams need gym cool room and bigger kitchen PARK FOR KIDS (UPGRADE)

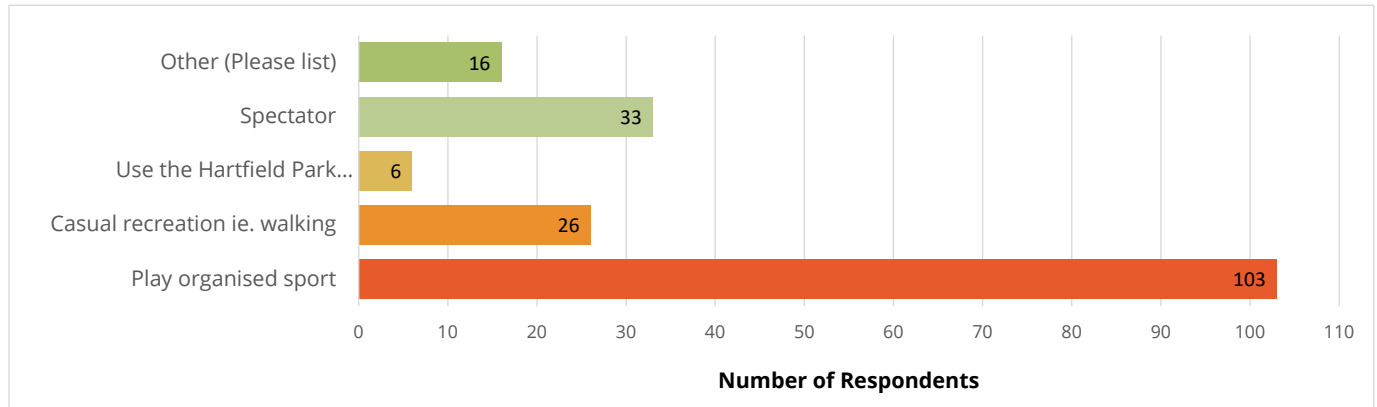

Respondent	Needs further consideration
77	No 1 field to be aligned for spectators 6 change rooms more parking Room for gym bigger kitchen
78	Need better gym facilities
80	Field 1 needs to be aligned for quality spectator viewing. Need 6 change rooms for cater for all mens & womens More parking. Need room for gym
81	No 1 Field needs to align so that spectators viewing is Need 6 change rooms to cater for all mens + womens teams
82	Changing Facilities No gym
83	Kalamunda rugby keep the same Clubrooms more parking that what's planned more changerooms like 6 and bigger kitchen
84	Rugby club should just stay as is, it doesn't need to be moved
85	Kalamunda [??] club needs their clubrooms
86	Kalamunda Rugby club keep the clubs room
88	Upgrade playground (fenced would be good so children aren't running around)
89	Clubroom (Union) with No 1 field Need Gym Better bathroom and more clubrooms Kitchen facilities
90	Yes. I believe the the area of the old pony club needs to be included in stage 2. It's considering, moving the mens shed into HPMP stage which I feel is an inappropriate facility to be conducted in a sporting facility present.
91	No 1 field needs to be aligned for quality spectator viewing. Need 6 changing rooms to cater for all mens & womens teams. Need more parking!! More for a gym. Bigger kitchen
92	Placement of rugby facilities
94	Need a room for Gym Need a big kitchen and cool room
95	Need more changing room's, more parking, & gym, cooler room bigger kitchen. No 1 Fields needs more aligned for supporters
96	Parking Changerooms Placement of the new facilities, area for a gym

Respondent	Needs further consideration
97	Spectator viewing from clubrooms
98	I am a long term member of the Tennis Club and believe the proposed co-location of the Tennis Club and Bowling Club into the one building is unnecessary and is not the best or most economic way of achieving the desired outcomes of the plan.
99	Can you explain why soccer is called Football in the plan and Australian Rules is called AFL. Soccer is the name for the roundball game in Australia and always has been. Australian Rules is known as Football in WA and all other states except QLD and NSW (where League is Football). Furthermore, AFL is the national league, not the name of the game, I doubt AFL will be played at Hartfield Park (or WAFL for that matter). There is absolutely no reason to call soccer, football, in this proposal. That is not the language used in general language and there is no reason to give it preference over Australian Football.
100	Enhanced lighting and playground equipment at the new hockey fields
101	Inclusion of the hockey fields precinct
102	Kalamunda hockey club needs to be added to the new plan to develop the lighting and carpark resolutions
103	I feel that the Hockey facilities need improving. Kalamunda hockey is a rapidly growing club. Currently the lighting situation does not allow for safe practice in the evening. We are unable to fit all of our teams under the lights even though we spread the training nights throughout the week. Having the lights only on one side creates a shadow that can make it difficult to see the ball and creates dangerous situations. Our club has been striving and advocating for a turf, it is a real shame that this is not mentioned in the plan. I understand the costs associated of a turf however it would be great to see the plan incorporated even in its early stages.
104	All sporting areas need to be catered for equally. Even though there are some amazing areas I don't feel that the full potential of the areas focused on are been fully considered.

Respondent	Needs further consideration
105	I noticed that Hartfield park Hockey club and the gold club are not included, and this club only has 2 lights for the size of the field and struggles to allow for training with this limited lighting. Lighting is therefore a safety factor and hockey balls are quite hard so the more lights surrounding the hockey fields the better the visiblility
106	KDHC has not been included and will be potentially sharing with 2-3 other groups. No lighting plan has been included for winter sport training at the club. Growth of any winter sport will be impeded and community engagement will decline.
107	I note the Kalamumda districts hockey club nor tee ball who co-locate the facilities has not been included in HPMP2. I am of the belief that the KDHC/FFTB Clubrooms and Playing Fields should be included in the Hartfield Park Master Plan Stage 2 for the purposes of planning for current and future co-locations. We continue to seek assistance with appropriate lighting to ensure the safety and well-being of both current and future junior and senior players as we play a small ball sport in the winter months and as such are of the belief that this facility should be included in the masterplan. It is my belief that potential future turf and carparking needs should also be included in this study as all has the potential to affect both our current and any future organisations we co-locate with.
108	We request that the KDHC/FFTB Clubrooms and Playing Fields be included in the Hartfield Park Master Plan Stage 2 for the purposes of planning for currant and future co-location.
110	Lighting on the bowls rink. bigger kitchen in bowls club
112	Consider changes to Morrison road alignment
114	Parking needs improvement
115	No
117	Parking and lighting needs upgrading generally.
121	Minor realignment of Morrison Road at blind corner and s bend near football club for safety reasons
127	New lights on bowling green
130	We request that KDHC/FFTB clubrooms and paying fields be included in the HPMP stage 2 for the purposes of planning and future colocation

Engage (Survey) | Reasons for using Hartfield Park

What is your main reason for using Hartfield Park?

What other reasons do you have for using Hartfield Park?

*Note: Text below has been included without edits as provided by respondents. Respondent's that did not include a comment have been removed.

Respondent	Other reason for using Hartfield Park
1	need lots of changes to current plan if FTC are to be actively included.
3	Volunteer in multiple sports to benefit children in the area.
11	Coach and volunteer for my children's local sporting club
12	Grandchildren play rugby union and life member of the Rugby union club
25	Future Men's Shed
27	Will be new Men's Shed
37	Men's Shed
41	Will use Men's Shed
46	Please listen to people that use the facilities on what is needed. The people on the ground are the ones that know best.
50	'- Coaching organised sport - Volunteer for community clubs
51	I also use the park when it isnt busy for personal fitness. I.e running.
52	I believe the consultant has not meet the needs of the development of the sport and too many open ended statements and contradictions.

Respondent	Other reason for using Hartfield Park
53	Whilst the HPMP consultation highlighted residents within a specific diameter of Hartfield Park - which services predominantly Forrestfield based sporting organizations, it is important to recognize that sporting clubs which represent a wider catchment (Kalamunda Districts Hockey Club) need to be considered as part of this plan. As a sport whose only home in the city is at Hartfield Park, the future needs of the club need to be considered an addressed at a time when considerable and sustained growth is occurring. Without inclusion, the club risks losing high level players to clubs which exist in cities where the potential for high performance facilities exists.
55	1.Needs hitting wall 2.Existing lights needs to be changed to LED 3.Need patio or undercover near the kitchen 4.New building wall to be straight not in angle
58	Building layout Bowls -tennis club. No thought has gone into this. First aide room in middle. End walls not square so losing space inside.
59	Rugby, Touch football, Training
60	Enjoying the biodiversity and cultural values of the site
61	Winter and summer sport. Skate park. (Touch & Rugby)

Respondent	Other reason for using Hartfield Park
62	Lighting at the hockey fields
67	socialise
90	The THE KDHC has held school clinics for some 5,000 children over the past 4 years and we foster their developpe at this venue. However, without lights this is very challenging and hazardness as current lights are not small ball regulated.
93	Birthdays
100	I like that the bush walks between all facilities at Hartfield are being preserved and enhanced whilst being mindful of preserving the natural environment
102	The lighting at Kalamunda hockey club is insufficient for the sport and amount of teams in the club
103	whilst this plan is for the sports and recreation, it would be great to incorporate the native flora and fauna and to acknowledge the indigenous people of the area in the plan. Whilst creating carparks please be mindful of the wildlife in the area and the plants.
105	Volunteer at the hockey club
106	Volunteer working at the club for Hockey
108	Volunteering at Hockey Club
109	All good. Looking forward to new changes
121	I believe the bowling club new facilities should include provision for the club to up[grade their bar at the clubs expense. This would require and extension of the building in the bar area by the shire. Building extension - shire expense, internal bar upgrade club expense
127	would like a mens shed so people can learn different skills
129	Making it bigger and better for the community

Engage (Survey) | Further comments

Respondents were asked "Do you have any further comments to add? Feel free to supply a separate, more in-depth submission via the City's contact details."

*Note: Text below has been included without edits as provided by respondents. Respondent's that did not include a comment have been removed. Personal identifiers have been redacted.

Respondent	Further Comments
2	I agree with all the comments made by the Forrestfield Tennis Club's management committee, regarding the better use of a shared clubhouse.
3	It has been noted that many contracts that are established between share use facilities benefit one party of another. This encourages conflict within the clubs and reduces the flexibility in organised sports in off season clubs. Great consideration needs to be applied to how facilities are used, with vesting powers allocated to City representatives to enforce fair usage. Rather than current practice of pushing this responsibility down a single club to govern a facility.
4	'-Financial Viability comments lead to interpretation that larger clubs get priority due to the having a larger cash flow. Priority should be based on benefits to the community at various levels and not just financial. Clubs such as Teeball are consistent and financial however, members age out at 12 years old. All its members residing in the Kalamunda community. Comparing to other clubs who don't have a age limit, however, a large majority resident outside of the community and a number of games are outside of the community. -Share responsibility on equal terms of users of facilities reduces the risk the facilities not being maintain. Taking pride and being accountable to other users of the facilities. MOU should not be engaged in without exploring other options first.
5	Further consideration to 2-3 netball courts (outdoor) would be greatly appreciated.
9	I have been playing rugby for KDRUC for the last 24 years, along with using the parks for extra activities. I believe if a shared faculty between cricket and rugby UNION is to exist more thought needs to be put into the layout of the building. Moving the building to where the cricket club rooms are now does not make for great viewing of the fields.. in fact terrible and I see it becoming an issue of getting people to stay in allocated zones set for alcohol. people will buy drinks and move to a location where they can comfortably watch the game and this would impossible to try and achieve. The size of the change rooms ! 55sqm might seem big to some but game day has 15 players plus another 8 reserves plus a manger , 2 coaches and Physio and some times extras some of the players weigh 150kg +, extremely large men and to try and stick all the players mostly of the larger statue compared to the other codes (cricket, soccer, afl) into a small room will not work. To me it would be a complete shame to see the club rooms upgraded but not to suit the actual sporting code. Kalamunda RUFC has been at hartfield park for a long time and has helped in the development of many young talented players but has lost these players to having substandard change rooms. With new FIT for PURPOSE I believe the member numbers will grow over the coming years. Also a HUGE problem is the car park set up, not enough parking at all and recently the soccer club had a large home carnival and we're instructing cars to park at the car park next to the KRUFC via there social media accounts. Despite KDRUC having a home game as well. This caused massive headaches for anyone trying to find a spot on the day. The club needs a gym for the growth of the junior players and senior players for rehabilitation, in the report it mentions about not affecting the gym at the recreation centre. The gym is used for pre season trainings and the growth of all junior players in academy . All players have external gym memberships but having a general gym to maintain and teach players is instrumental in the rugby club staying in premiership status.

Respondent	Further Comments
12	There needs to be more consultation with the KDRUC membership as the Rugby Union Family is a significant body of local people across juniors and seniors and social membership.
13	Rugby Union Park just isn't ideal and selfish way of separation. Rugby WA has a strong hold in Perth and deserves more 1st choice. Instead of always getting the last choice.
17	The sooner this plan is implemented the better to help men in Forrestfield
18	Please allow ample parking for all activities.
21	Hope Mens Shed will be better than correct especially regards safety and room
23	Men's Shed is a priority
28	The proposed Men's Shed facility will be a great improvement and allow for expansion of membership.
29	A larger Men's Shed would be an asset
31	I believe the Men's Shed is a vital community organisation which should be fully supported.
32	Please try to retain existing mature vegetation if possible - local species
33	It is good to see progress in the lower foothills area instead of most things happening above.
34	Leave that to the committee discussions
36	Will the new Men's Shed have disability access
38	Larger and safer [Men's Shed]
39	Our membership is growing and now too large for current location [Men's Shed]
43	New Men's Shed should be wheel chair friendly
44	Future Men's Shed
45	Need to have wheel chair access
50	'An artificial playing surface at KDHC would be fantastic: - multi use (hockey, summer hockey, outdoor futsal, ultimate frisbee, etc) - long term investment benefiting city and club. Currently KDHC turf teams train at Guildford Hockey club, if training was available at KDHC, revenue would not be lost to other cities. - attract more members to club - potential for premier level hockey and even international hockey to be played on surface.
52	Please refer to the Forrestfield Tennis Club submission, and I hope that our requirements are met!
54	Having more various sports team for our local to join. I. E volleyball team, Netball team etc
55	1.Needs hitting wall 2.Existing lights needs to be changed to LED 3.Need patio or undercover near the kitchen 4.New building wall to be straight not in angle
56	I have sent an email separately regards my concerns.
58	Please see submission from Forrestfield tennis club
59	Consultation with our broader playing group - old timers, as there is a lot of history at this clubrooms we currently have.
60	Will provide further details in an email
61	The purpose to amalgamate of an agreement can only be beneficial if council are prepared to listen to the community that access park and strive to find the funding necessary to further their members "needs". "Not" nice to have but NEEDS! 6 change rooms not 4
62	More parking less gravel at the hockey fields, better lighting at the hockey fields.
64	Massive history associated with existing clubs/facilities, specifically Kala Rugby Club. Need to consult wider.
66	We have over 100 volunteers at our rugby club. Need facilities to cater for everyone. - But

Respondent	Further Comments
68	Water fountains to fill water bottles. Lighting Better facilities for all Better parking Grandstand
69	Rugby union is growing and larger facilities will be required than what is currently planned.
70	Consultation with the club as a whole
71	I believe that the history of the rugby club is being over looked. Rugby union is a growing sport in mens and womens and the lack of changerooms in the new complex is lacking. The kitchen and bar is also not big enough for a club of our size. The location of the new complex is also unfit for viewing rugby games.
72	A massive upgrade is needed in all areas. Facilities look old and rusty, also buildings seem to fall apart or not be useable, due to damages. A new playground fenced would be ideal for all our children, keeps them safe.
73	Need female changing rooms!! Need more carpark Better playground for the kids Need 6 changerooms not 4 Posistionng of the club is bad for us
75	Alignment of the building need to have good filed viewing New pitch on Morrison Oval would resolve this. Better playground for the children
76	Consultation with our broader playing group & old timers as there is a lot of UPGRADE KIDS PLAYGROUND OUTSIDE RUGBY CLUB
77	Consultation with old timers and broader playing group as the club has a lot of history
78	Playground for moko's
79	N/A
80	Our broader playing group & old timers as there is a lot of history at clubrooms we currently have.
81	Consultation with our broader playing group - old timers as there is a lot of history at the club rooms we currently have
82	Need more parking Need room for a gym Need a cool room & kitchen to be bigger Need Number 1 Field to be aligned for quality for quality spectator viewing
88	would like gym for our Club
89	Consultation with our broader club suporters and lifetime members
90	Phase 1 stated relocation of the kdhc to pony club with new club rooms 3 playing fields with ONE FIELD FULLY LIT. This is not the case. Could someone please explain.
91	Consult with our broader playing group - (oldies) as there is a lot of history that needs preserved
94	Bigger playground to accomadate kids. Rugby union is the main user of the park and needs to be considered for the next 25 years.
95	A bigger play ground for kids with a fence around it and light

Respondent	Further Comments
98	I have attached a separate list of recommendations I believe will be necessary to make the relocation of the Tennis Club a success should it proceed. Somehow the new facility needs to replicate the Club's current facility where members can relax knowing the children who accompany their parents can play freely and safely. The club has always had a fantastic family friendly culture and that needs to be able to continue. Submission: DRAFT HARTFIELD PARK MASTER PLAN STAGE 2 Additional Notes (1) The two new courts will undoubtedly become the Club's show courts so they will need to be on the same level as the existing courts. This will allow spectators to watch the matches from an elevated position on the verandah. Also, the spacing between the courts will need to at least match the existing courts 1-4. (2) The two new courts need to be fitted with the latest and most efficient lighting system. As the wiring to our existing courts will need to be replaced because of the demolition of the club house the opportunity should be taken to replace the old poles, control gear and lights on courts 1-4 with "break back" poles to reduce future maintenance costs. Obviously the 4 "break back" poles from court 6 can be reused for this purpose. (3) Ideally the colour and type of surface of the two new courts will match the existing five courts. (4) A playground plus adequate free space needs to be provided for children who have accompanied their parents and siblings for social tennis or coaching. Obviously safety will need to be a priority for these children. (5) An access gate will be required from the new club house to the existing courts 3, 4 and 5. (6) When the bowling club was established a temporary retaining wall was created on their side of the dividing path. This wall was constructed with bits of above ground pool sheeting and of rubber material. I believe this is the opportunity for a structurally sound retaining wall to be constructed to replace the ramshackle temporary fix currently in place. (7) It is possibly premature to look at the design detail of the club house but this pandemic has highlighted simple benefits of our current building. The most obvious has been the practical use of an external serving hatch which has allowed members to serve themselves morning or afternoon tea while staying a safe distance from each other. So locating the kitchen on an external wall with an external hatch out onto the verandah would be a good solution. (8) It is important the architects designing the new club house extension take into account the afternoon summer sun. An appropriate amount of shade and lawn will need to be provided for the comfort of the members. 
99	Can you explain why soccer is called Football in the plan and Australian Rules is called AFL. Soccer is the name for the roundball game in Australia and always has been. Australian Rules is known as Football in WA and all other states except QLD and NSW (where League is Football). Furthermore, AFL is the national league, not the name of the game, I doubt AFL will be played at Hartfield Park (or WAFL for that matter). There is absolutely no reason to call soccer, football, in this proposal. That is not the language used in general language and there is no reason to give it preference over Australian Football.
100	In keeping with the upgraded and world class facilities for Soccer and Rugby (lighting, grand stands etc) perhaps turf fields for hockey should be considered. After all this is in keeping with the Hockey WA grand plan
101	The new hockey facility is great, however the lighting is inadequate and restricts the use and creates a safety issue.
104	If all sporting facilities are taken into consideration, then can they all have access to lighting areas. I have noticed that with some they have more lit spaces than others. Through this more sporting areas are able to be used and cater for a larger population. This is also a major safety factor. Some sports are having to train under minimum lights.
105	The hockey club NEEDS more lights, 2 is not enough for the size of the field and the number of participants training at night

Respondent	Further Comments
106	As a parent of a junior player, volunteer and a players myself we are truly grateful to be the custodian of this beautiful complex But I feel the lighting at the club grounds for training is dangerous and inadequate for our sport. We engage 12 primary schools with Hockey clinic that are run free of charge by our volunteers within the city. the kids often come down to our club in the afternoon after school clinics to participate further in hockey as a social community program, these programs are ran all year round. I feel if we can't provide a safe environment for these kids to participate we will be unable to grow the sport further and community engagement will decline.
108	It is not clear why the KDHC has been excluded in the Master Plan Stage 2. Is it because we are now located outside the Hartfield Park? Our neighbours the Tennis club and the Bowling Club are also located on Hartfield Road? It is very disappointing that the KDHC is the one Sports Club not to be included in the Master Plan Stage 2. We need financial and actual support till we can stand on our own two feet. Like with the other Clubs we need support and understanding. Despite COVID we have witnessed a very positive KDHC development in members and organisation. We finally have been able to get the City to fill in the gaps after completion of the infrastructure. There are still shortcomings from the past to be addressed or are already being brought forward. The increase in total membership is very pleasing and the plans are for growth. The increase clearly shows that there is a healthy interest from the Local Community and Local schools. KDHC will expand considerably with the help from the Kalamunda City and our very active Club Members making lots of private/unpaid time available. We all are in this together. The Community and Government will benefit and the kids the Winners.
130	It is not clear why the KDHC has been excluded in the master plan stage 2. it is because we are now located outside the Hartfield Park? Our neighbours the tennis club and the bowling club are also located on Hartfield road? It is very disappointing that the KDHC is the one sports club not to be included in the master plan stage 2. Submission Respondent 1 [REDACTED]

Hello

I hope all is well.

Firstly congratulations and thank-you for such a Community benefiting initiative.

I am an active adult Member of the Forrestfield Tennis Club and so the primary focus of my submission is in relation to the plans for the redevelopment of the tennis club and facilities.

In response to the proposed Hartfield Park Master Plan #2, the amendments or inclusions that I would request be made to the plans are:

- » Include additional signage to identify clearly where available parking is located.
- » Extend pathway along the north-eastern end of the existing courts to Court 5.
- » Inclusion of an additional gate to access Courts 3 & 4
- » As part of the development, propose that Court 6 remain as a public court (ie accessible to the general public) and the retaining wall between Court 6 and Court 5 be raised and turned into a hit-up/rebound wall.
- » The proposed new Courts 7 & 8 to be fitted with LED lighting and lighting on Courts 1 - 5 to be upgraded to LED as part of the development.
- » Proposed new Courts 7 & 8 to be constructed with the playing surface level with existing Courts 1 - 5 and to include good spacing between the proposed new Courts 7 & 8, as well as good drainage.
- » A playground area and appropriate playground equipment be included at a suitable location within the immediate vicinity of the tennis club redevelopment.
- » An additional shaded seating/viewing structure be provided between existing Courts 4 & 5 (one is already shown as proposed on the plans between existing Courts 3 & 4) at the north-eastern end of courts outside of the fenced court area.
- » Recommended amendments to the building of clubhouse extension:
 - » A serving/access/counter hatch (similar to current clubhouse) be included in the new clubhouse extension providing external access to the kitchen.
 - » The verandah area on the plan for the new clubhouse extension to be increased in size to extend the whole length/width of the south-western end of the new clubhouse extension.
 - » The social area on the plan for the new clubhouse extension to be made square (ie angled wall on the south-western end be made square to the other walls), increasing its size from 70sqm to approx 75sqm.
 - » The shared First Aid room be moved to a location where it ideally has an entrance door incorporated in an external wall of the building so as to minimise intrusion into the Tennis Club when access to the First Aid room is required.

Thank-you for the opportunity to contribute to the final planning for the redevelopment of the Forrestfield Tennis Club and I hope that the above suggestions can be incorporated. The suggestions are based on the foreseen practicalities of the various aspects of the design from the perspective of a user of the current facilities.

Please do not hesitate to contact me to discuss as necessary.

Kind regards

Subject Submission - Hartfield Park Master Plan #2 - Forrestfield Tennis Club

Hello

Firstly congratulations and thank-you for such a Community benefiting initiative.

My husband and two daughters are active Members of the Forrestfield Tennis Club and so the primary focus of my submission is in relation to the plans for the redevelopment of the tennis club and facilities.

In response to the proposed Hartfield Park Master Plan #2, the amendments or inclusions that I would request be made to the plans are:

- » Include additional signage to identify clearly where available parking is located.
- » Extend pathway along the north-eastern end of the existing courts to Court 5.
- » Inclusion of an additional gate to access Courts 3 & 4
- » As part of the development, propose that Court 6 remain as a public court (ie accessible to the general public) and the retaining wall between Court 6 and Court 5 be raised and turned into a hit-up/rebound wall.
- » The proposed new Courts 7 & 8 to be fitted with LED lighting and lighting on Courts 1 - 5 to be upgraded to LED as part of the development.
- » Proposed new Courts 7 & 8 to be constructed with the playing surface level with existing Courts 1 - 5 and to include good spacing between the proposed new Courts 7 & 8, as well as good drainage.
- » A playground area and appropriate playground equipment be included at a suitable location within the immediate vicinity of the tennis club redevelopment.
- » An additional shaded seating/viewing structure be provided between existing Courts 4 & 5 (one is already shown as proposed on the plans between existing Courts 3 & 4) at the north-eastern end of courts outside of the fenced court area.
- » Recommended amendments to the building of clubhouse extension:
 - » A serving/access/counter hatch (similar to current clubhouse) be included in the new clubhouse extension providing external access to the kitchen.
 - » The verandah area on the plan for the new clubhouse extension to be increased in size to extend the whole length/width of the south-western end of the new clubhouse extension.
 - » The social area on the plan for the new clubhouse extension to be made square (ie angled wall on the south-western end be made square to the other walls), increasing its size from 70sqm to approx 75sqm.
 - » The shared First Aid room be moved to a location where it ideally has an entrance door incorporated in an external wall of the building so as to minimise intrusion into the Tennis Club when access to the First Aid room is required.

Thank-you for the opportunity to contribute to the final planning for the redevelopment of the Forrestfield Tennis Club and I hope that the above suggestions can be incorporated. Community Submissions 5, 6 & 7

Submission Respondent 5 [REDACTED]

Subject Hartfield park plans

I think the plans for rugby/cricket are a step backwards and no improvement on the current setup. Facilities are smaller, will undo work undertaken only months ago at the rugby facility, a huge waste of funds. It will remove the community spirit where members have fundraised and much of the furniture, fixtures is donated, and this is recognised and visible.

Where is the storage for all sport related equipment.

There is zero vantage/visibility for the rugby field, what is the point of a clubroom that can't see the field from the best position.

Concerned

Submission Respondent 6 [REDACTED]

Subject Hartfield Park Management Plan Stage 2

Dear Mayor and Councillors

The City of Kalamunda has a vision for Hartfield Park to be a place for everyone to grow, learn and play in the heart of Forrestfield as stated on your Engage Kalamunda webpage for comment on this plan. These are very nice words but there is one club namely, the Kalamunda Districts Hockey Club that has been inequitably left off the Hartfield Park Management Plan Stage 2 therefore, the vision statement is not inclusive. Maybe because the KDHC has a new building and grounds the consensus is that enough of the Grant money has been distributed to the KDHC however, to be excluded from the HPMP Stage 2 for 10 or more years with no guarantee of re-entering HPMP Stage 3 is unfair, seemingly an act of discrimination and just plain wrong.

It is also interesting to note that on the 13/04/2021 the KDHC raised many questions at a council meeting about various concerns, including inadequate lighting at the grounds, to the CoK and also asked for a deferral of the final approval of the HPMP Stage 2 to allow more time to understand this 'cookie cutter plan' only to suddenly change course and not press the CoK for these requests.

The KDHC has a membership of over 400 people and a highly successful junior program that other clubs find enviably impressive. They have 11 junior teams which equates to approximately 150 players with ages ranging from 5 years to under 17 years. Since their junior program started, they have run hockey clinics which has involved 5000 children.

The KDHC members put in countless hours of volunteer work for the community and to be ostracised by not being included in the Hartfield Park Master Plan Stage 2, I feel, is demeaning and offensive.

Kind regards

Submission Respondent 7 [REDACTED]

Subject Re: Confirmation instructions

Interesting that KDHC is not included in any proposed further development but that we will also be required to share the facilities with teeball and the Forrestfield Mens Shed through MOU!!!

Community Submission 8

Submission Respondent 8

HFP Master Plan Comments

Area of Comment	Recommendation
Pg 16, Section 2.4 Summary Conclusions, dot point 4 Agree with this point as it relates to avoiding impacts on environmental values	Suggest that for any proposed impact on the environmental values, a full assessment of the financial, reputational and project cost of each such action be undertaken and communicated to the City and Community
P46, section 5.3, Table 9 The assessment of the Environmentally Sensitive areas is clearly a summary position posed by a person with no knowledge of the on-ground condition of the bushland in question (e.g. only at a desktop level). The bushland is in good condition, with some areas of degradation, that with additional management could be returned to very good – excellent condition. Further, there are individual occurrences of the threatened DRF <i>Conospermum undulatum</i> (Wavy-leaved Smoke bush) in immediate proximity to the grassed area around Morrison Oval which should be surveyed to allow for an adequate understanding of any proposed impact to occur. This bushland should not be written off and developed. The map in this section does not show 'poor condition bushland', it shows the extent of the Environmentally Sensitive Areas (as shown on pg 90 of the document) protected under the EPBC Act. Given the offset required to clear the bushland for the skate park was ca. \$500,000 (Poison Gully Offset Project) and that the State Government now has a higher offset ratio (was 5:1, now is around 11:1) any clearing is likely to attract a significant 'offset Cost'. Therefore, it is not only good sense to avoid clearing any further bushland from Hartfield Park, it is economically sensible to design around any bushland (preventing loss), rather than allow it to suffer damage and accept additional build costs.	Recommend the City consider avoiding clearing any bushland as part of the HFP Masterplan. This would reduce offset costs and increase reputational value
Pg 48, Section 5.4 Summary Considerations, dot point 4 I agree with the first part of this paragraph, ergo that the clearance of any further bushland should be avoided. I disagree with the second part, as it suggests that should the City decide to remove bushland, an increase in the playing surface would be possible. Without being specific as to the exact location of the location of potential opportunities to expand, or the associated cost (in terms of potential offsets) these expansions should not be considered. Suggest rewording and/or reconsidering the second part of this dot point.	Recommend vegetation not be traded off for infrastructure. Please reword or reconsider this sentence
Pg 48, Section 5.4 Summary Considerations, dot point 6 The removal of any trees for the benefit of playing surfaces or other infrastructure should be carefully considered in light of the impact such action would have on the City of Kalamunda's Urban Canopy retention policy. Any such removal should be only undertaken with thorough community consultation and in hand with a agreed and additional tree canopy planting program which returns trees of more than 3m to the immediate area (Trees under 3m are not counted towards Tree Canopy Calculations for the City). If canopy is removed, I suggest a replanting ration of 3:1 or higher is undertaken, to ensure canopy rates in the medium to long term are increased, not reduced, as part of any re-development.	Recommend the City avoid any tree removal. If trees are removed, the City should plan for a 3:1 tree canopy replacement planting program, based on canopy area lost, not # trees lost)

Pg 48, Section 5.4 Summary Considerations, dot point 10 Any increase in the hard surfaces as a result of building or carpark infrastructure should be only approved with clear design guidelines for permeable surfaces and tree-planting (1 tree per 6 car bays) in carparks. Recharge in the area is critical for the Aquifer recharge program, shading of park users vehicles, amenity values and shade for spectators and habitat for wildlife	Recommend any increase in hard surfaces include Water Sensitive Urban Design measures to allow water to re-enter the aquifer below HFP for future use, not be exported from the area and lost to recharge
Pg 48, Section 5.4 Summary Considerations, dot point 11 This point speaks to the clear impact any expansion of playing fields or infrastructure has in relation to the environmental values of the site, which if proposed/undertaken, will result in significant increased cost to the Master Plan. Offsets are expensive to plan, undertake and manage, and avoiding the need for offsets makes good financial sense, good environmental sense and would show the City of Kalamunda as a leader in design, working within community expectations and managing future project costs.	Recommend the City consider avoiding clearing any bushland as part of the HFP Masterplan. This would reduce offset costs and increase reputational value
Pg 78, Section 7.3 Car Parking Analysis There appears to be no reference to any proposed ratio of trees per parking bay, as is standard practice across local governments in WA. Refer Section 3.3.3 of this document as an example https://www.canning.wa.gov.au/getmedia/1e8ee2d0-b1bd-46cf-a518-626a5b046f19/LP-09-Tree-Retention-and-Planting-Development-(Adopted-15-10-2019)	Suggest a ratio of trees per carpark is added into the Masterplan in relation to development (and retrofitting) of additional carparks
Pg 145, Table 32 This table identifies the individual, significant values of the DRF on site. This is the same DRF present in the majority of the bushland remaining on site, and it should be clearly iterated across the whole document that any damage to any individual plant from any use, user or activity can attract significant penalties, should such action occur without a suitable permit	Suggest that the significance of protecting individual DRF on the entire site be highlighted early in the document, not buried on pg 143.

Overview of Club Consultations

2021 Consultation Meetings

Formal Consultation Meetings were held with representatives from the following User Groups:

Forrestfield Mens Shed (FMS)	29 April
Forrestfield & Districts Bowling Club (FDBC)	29 April
Forrestfield Tennis Club (FTC)	29 April
Kalamunda & Districts Rugby Union Club (KDRUC)	30 April
Forrestfield Cricket Club (FCC)	30 April
Kalamunda Bulldogs Rugby League Club (KBRLC)	30 April
Forrestfield United Football Club (FUFC)	30 April
Forrestfield Little Athletics Club (FLAC)	4 May
Forrestfield Football Club (FFC)	4 May
Forrestfield Flyers Tee ball Club (FFTBC)	

Eleven formal submissions from various Hartfield Park User Groups and/or supporting bodies were received; noting specific requests for amendment.

Two written submissions from Forrestfield United Football Club (FUFC) and Kalamunda Districts Hockey Club (KDHC), did not believe their needs were adequately addressed in the Plan and requested some specific inclusions.

The Plan did not include KDHC and FFTBC as its primary focus was to colocate the multiple single use sporting facilities at Hartfield Park. Noting these two users were co-located through HPMP Stage 1.

The key theme arising through the community consultation period, and stated in the club written submissions received, is that there is strong support for the co-location of facilities and entering into joint use lease agreements at Hartfield Park. In addition, it was noted that the existing single use club infrastructure lacks functionality, is ageing, is in poor condition and does not meet the needs of users.

A summary of the specific major requests for inclusion within the Plan from the affected user groups is outlined below, along with the justification or otherwise for their inclusion:

Request 1: Provision of two additional changerooms each for KDRUC and KBRLC & larger changerooms for KDRUC

- » An analysis of changeroom provision across the site supports the provision of only two additional changerooms at the centrally located Rugby Union / Cricket facility, on the proviso that these amenities are able to be shared amongst other site users ie. KBRLC and FUFC.

- » The proposed changeroom sizes for KDRUC meet the Rugby Union facility guidelines (between 55 and 80 sqm each). Increasing the size of only two changerooms to 70sqm each is supported to provide improved flexibility in particular to hosting Premier League Rugby Union matches.

Request 2: Provision of a 20 sqm Gymnasium within the Rugby Union / Cricket facility

- » This request is not supported by the City, however if KDRUC require a gymnasium within the new Rugby Union / Cricket facility, then they can fund this portion of the project separate to any advocacy funding received by the City.
- » The provision of gymnasiums within community level sporting facilities is not supported as it is considered above the level of provision required. In addition, the City already operates a gymnasium at Hartfield Park Recreation Centre (HPRC).
- » It's inclusion would also set a precedence across the City and lift expectation for provision.

Request 3: Increase sports floodlighting on Morrison Oval from 50 to 100 lux & Re-prioritise

- » KDRUC and FUFC both requested that the sports floodlighting to Morrison Oval be 100 lux across the site and to re-prioritise this project from Stage 2B to Stage 2A.
- » The increase to 100 Lux lighting is supported as it will provide additional usage of the fields and facilitate the KDRUC being co-located with cricket at the proposed building location.
- » The reprioritisation of the Morrison Oval lighting from Stage 2B to Stage 2A is noted, however is not supported as a priority project for Stage 2A, as these projects have already been endorsed by Council.

Request 4: Increased storage area for AFL / Little Athletics Clubrooms

- » This request is not supported as the Plan proposes a total of 140sqm of both internal and external storage space for the AFL / Little Athletics Clubrooms, which is deemed to be sufficient for both user groups. The storage area is similar in size to the storage areas proposed for the Kalamunda and Lesmurdie Little Athletics Club at Pat Moran Pavilion, Kostera Oval.

Request 5: 2nd AFL Oval for FFC

- » The FFC have proposed developing a 2nd AFL Oval at Hartfield Park, over a section of the adjacent Hartfield Park Golf Course (HPGC).

- » This request is not supported given the significant impacts on the HPGC who are a long-term tenant at the site and that the project will require the clearing of Bush Forever sites.
- » It is noted that additional sports space will be required across the City into the future to meet growing demand, however Hartfield Park is a significantly constrained site that is maximised. This places greater importance of delivering new sports space in the future at sites under investigation as part of the Forrestfield North District Structure Plan.

Request 6: Increased size of FUFC Away Changerooms and Storage and inclusion of a Universally Accessible Toilet (UAT) within the main FUFC facility

- » a) Increasing the size of the away changerooms from 45sqm to 60sqm is supported as it will improve the clubs operations and alignment to Football Federal Australia National Premier League standards. It also better standardises the changeroom infrastructure across the site.
- » The inclusion of a UAT in the main FUFC facility (ground level) is supported, noting an existing storage space will be required to be converted to the UAT and is to be managed by FUFC.
- » Increasing the size of the storage area in the away changerooms is also supported as it will facilitate the inclusion of a UAT in the main FUFC facility, without reducing storage opportunities.

Request 7: Increased size of the FUFC Social Space and Stadium Development

- » FUFC did not support the proposed design of the increased social space within the draft Plan and requested the social space be extended into the adjacent HPRC squash courts (Courts 3 and 4). This request is not supported as it would impact on the HPRC operations and the existing squash users.
- » FUFC also requested the City investigate the idea of a boutique stadium at Hartfield Park. This could be considered as part of a future stage 3 of the HPMP or a review of the entire HPRC facilities.

Request 8: KDHC requested inclusion within the Plan

- » KDHC outlined that they have experienced a period of growth since their relocation to the new hockey / tee-ball facility and that they have additional facility needs such as a synthetic turf pitch and additional sports floodlighting.
- » The focus of the Plan is on the co-location of clubs that are currently in single use facilities.
- » The Plan does not preclude other user groups at Hartfield Park i.e. KDHC from future developments at the site.
- » In 2020, KDHC completed a business case into a synthetic turf at Hartfield Park, with the outcomes revealing that this would not be viable for at least another ten plus years.
- » KDHC sports lighting improvements can be considered through the City's annual Capital Grants program. This would include a lighting design considerate of both short and long term needs.

Request 9: Increased provision of carparking at Hartfield Park

- » This was a common theme identified throughout the consultation process.
- » Hartfield Park is a constrained site with limited car parking expansion opportunities available.
- » A detailed car parking assessment has been completed, which determined it was not viable or practical to meet peak car parking demand which is the same at all major City reserves. HPMP Stage 2 proposes an estimated additional 116 bays.
- » Further to the draft Plan additional car parking opportunities at Reid Oval and the existing FDBC site have been identified and will increase car parking by a further 35 parking bays.

In addition to the above major requests from affected user groups, several minor requests relating predominately to the detailed design stage were received during the consultation process. Several of these requests were able to be incorporated into the final Plan, whilst others will be resolved during the detailed design phase.

Stakeholder feedback will help shape the development of the Master Plan, before being released for final public comment.
